

Lexbe eDiscovery Services allow you to slash the cost of eDiscovery and document review so you can meet even the toughest production deadlines with time and budget to spare. The collection of electronically stored information (ESI) is accelerating rapidly, unfortunately the time allotted to review that information has not. Lexbe helps you get that time back with the fastest processing in the industry so you get documents back for review in days not weeks.

### How it Works

Lexbe's highly scalable architecture allows us to manage even the largest eDiscovery jobs quickly and cost effectively, even large Culling, OCR, Production and TIFFing jobs that others avoid. The end result is that you get more time to review documents to build your case.

### Proven Security – Maintain Confidentiality With Confidence

Lexbe only uses the strongest security when managing your case data. We transmit and store your ESI using strong 256-bit (AES-256) encryption, the same technology used by leading financial institutions.

### Key Features and Benefits

Lexbe's comprehensive services include everything you need for eDiscovery Management:

- Support for multiple file inputs and options including ESI Culling+, Native Processing+ (PDF or TIFF)+. Native Extraction+, eDiscovery OCR+, Bates Stamping+, and ESI Preservation+.
- Multiple Load File support including Excel XLSX (Lexbe) DAT/OPT (Concordance, iPro, Relativity, Ringtail) and DII (Summation) standard on all productions.
- Fast loading, processing and delivery up to a Terabyte of data per day.
- Advanced Culling includes full metadata and keyword culling on extracted and OCR'd text.
- Extracted text of Natives and OCR of images on all jobs to improve search results.
- Blended production including Natives and PDFs offered on all productions (including TIFF).
- Fast delivery, with most jobs completed in 3 business days.
- Hosting services and review tools with lightning fast search and review options.
- Expert eDiscovery Consulting professional services for strategic management, meet & confer, project management, ESI protocol negotiation, and more.
